Developmental Psycholinguistics: The acquisition of abstract knowledge of language among typical and clinical children and adults.

Methods: Behavioral methods, Event-related potentials (ERPs), corpus analyses, and computational modeling.

RESEARCH PROJECTS IN PROGRESS

Project 1 (Dissertation): Examining the role of individual differences and syntactic constraints in the processing of reflexives in L1 and L2 English: an ERP investigation.

Project 2 (Data collection ongoing): Long-lag morphological priming depends on form overlap.

Project 3 (Manuscript in prep): Maternal input quality and early language outcomes in late talkers: A longitudinal analysis of lexical and syntactic development.
